sharemundo

Connecting. Industries.

Plan, control and monitor projects professionally, exchange data efficiently, securely and purposefully, build marketplaces and connect industries...

...that's sharemundo !

sharemundo services for your industry projects

01 Consulting

- ✓ Process analysis and optimization,

- ✓ Information/data management and digital transformation support.

02 Technology

- ✓ Implementation of our **sharemundo links® / lip®/ lim®** solutions for project and business management,

- ✓ Specific development adapted to your project/business needs.

03 Resources

- ✓ Providing human resources to operate our solutions during your projects,

- ✓ Supplying engineering resources to complete your project teams.

Partnering for your project success

sharemundo supports companies worldwide in optimizing their industry projects :

- ✓ Setting up methods to improve your performance, gain in efficiency and increase the profitability of your current and future projects,

- ✓ Reducing the use of spreadsheets, emails or custom-made tools,

- ✓ Aggregating data from your various tools/software to provide with one interface for the user.

Besides providing technical solutions, **sharemundo** is partnering to be aside you as digital evolutions need to be done brick by brick to ensure user adherence.

Platform for managing your projects

sharemundo links® is the project platform centralizing information, including automation to facilitate recurring tasks and displaying connected KPIs. It is the common collaborative interface for every user involved to get relevant and consistent information, share data and updates.

sharemundo lim® is intended to be a marketplace gathering companies' services and products capabilities. Requests and relevant proposals can be submitted directly from **sharemundo links®** to **lim®** creating an efficient match between supply and demand.

sharemundo lip® is the data integrator connecting your existing internal tools (CRM, PLM, Schedule, DMS, etc...) to **sharemundo links®** for a transverse and integrated data management. **sharemundo lip®** also connects **sharemundo links®** platforms one with another to provide e.g. internal cross-projects views or automated data exchange between you and your suppliers/customers.

Platforms with multiple advantages

- ✔ Saving time through recurring tasks automation, quicker access to your relevant information/documents and KPIs,

- ✔ Breaking information silos by consolidating data from your different tools/softwares,

- ✔ Adaptable to your needs and scalable over time to fit new expectations or for a progressive implementation of features,

- ✔ Flexible to cover any existing business process, easy to use and to deploy in your current IT and work environment.

Our vision for the future

"Thinking information exchange at the industry level and not only at the company level is driving our vision for the future"

This requires tools that can communicate across organization and share securely information, data, reports between the various stakeholders of one project till one industry,

This is beneficial not only for business success but also for digital sobriety by reducing the use of unnecessary emails and data storage energy consumption.

sharemundo...
an international history

sharemundo was founded in 2006, in Munich - Germany and started to be involved on numerous large-scale projects locally and in the United States as a consulting company and SharePoint solution integrator.

sharemundo France joined the adventure in 2018 to support new local contracts and opportunities and to develop activities in Southern Europe.

s**haremundo Bulgaria** was then created in 2019 where our technical team is improving our solutions every single day, based on our experience and customer expectations.

A qualified team for the
digitalisation of your industry projects !

We are connecting the best of two worlds combining project management experience and IT expertise. This allows us to understand your needs, define the best solution and implement user centric tools.

sharemundo is resolving
your project related issues
